TRAVEL FOR THE WORKING JET SET

In a city that offers access to the best of everything, it's easy to find your niche. For some, that might be an underground poker club. For others, it might be a patrons circle of New York City Ballet. For kids, it is almost always candy. Candy is a culture among the younger set, and while most candy shops don't promise a particularly memorable travel experience, the few that do can turn an otherwise-pit stop into its own destination.

[The Sweet Shop NYC](#) owner Kelly Jaime goes by "the Candyman," but we think "King Kandy" is more appropriate: His tiny shop feels like classic Candyland. Against cream-colored walls, puppets dance and candy ropes wreath the chandelier. And there's a little of everything: gummies in jars, Swedish candies in drawers and chocolate-dipped pretzels on platters.
